INDUSTRIAL CLEANING EQUIPMENT

H15

COLD WATER HIGH-PRESSURE WASHER

A versatile industrial cleaning solution for automotive, mechanical repair, paper mills, municipal engineering, construction, oil fields, petrochemicals, power and food applications.

150 BAR	8 L/MIN	2.5 KW	1450 RPM
Working Pressure	Flow Rate	Power	Motor Speed

APPLICATIONS

AUTOMOTIVE · MECHANICAL REPAIR · CONSTRUCTION · MUNICIPAL ENGINEERING · OIL & PETROCHEMICAL · POWER · PAPER MILLS · FOOD

KEY FEATURES

01 **Industrial-grade pump**

High-precision solid ceramic plunger crankshaft pump with multi-layer sealing protection.

02 **Long-duty motor**

Professional customized industrial-grade high-performance motor for reliable long-period operation.

03 **High-density filtration**

Inlet filtration system helps filter impurities from the water supply.

04 **Adjustable pressure**

Visual pressure gauge and pressure regulating valve support 0–150 bar adjustment.

05 **Gun-trigger control**

Machine starts from the gun handle and provides delayed shutdown after gun release.

06 **Overload protection**

Automatic overload shutdown protection function.

07 **Heavy-duty frame**

Integrated steel frame with sturdy construction and heavy-duty solid wheels for easy movement.

TECHNICAL DATA

Model	**H15**
Working Pressure	**150 bar / 15 MPa**
Flow Rate	**8 L/min**
Power	**2.5 kW**
Motor Speed	**1450 rpm**
Power Supply	**220 V (50) Hz**
Production Dimensions	**1.02 × 0.63 × 0.88 m**
Weight incl. packaging	**110 kg**

STANDARD ACCESSORIES

01 **High-pressure hose**
15 m / pc

02 **High-pressure gun**
1 set

03 **Angle nozzles**
3 sets

BUILT FOR TOUGH, STUBBORN DIRT

Powerful rotary nozzles help remove tough oil stains, tree roots and bark adhering to surfaces.
