INDUSTRIAL CLEANING EQUIPMENT

H20

COLD WATER HIGH-PRESSURE WASHER

A versatile high-pressure cleaning solution for automotive, root carving and bark peeling, mechanical repair, paper mills, municipal engineering, construction, oil fields, petrochemicals, power generation and food processing.

200 BAR	15 L/MIN	5.5 KW	1450 RPM
Working Pressure	Flow Rate	Power	Motor Speed

APPLICATIONS

- AUTOMOTIVE
- ROOT CARVING / BARK PEELING
- MECHANICAL REPAIR
- CONSTRUCTION
- MUNICIPAL ENGINEERING
- OIL & PETROCHEMICAL
- POWER GENERATION
- PAPER MILLS
- FOOD PROCESSING

KEY FEATURES

01 **Industrial-grade pump**

High-precision industrial-grade solid ceramic plunger crankshaft pump with high-pressure resistance and multi-layer sealing protection.

02 **Four-level low-speed motor**

Professional customized four-level low-speed motor designed for long-term working capacity and reliable operation.

03 **High-density filtration**

High-density inlet water filtration system helps filter impurities from the water.

04 **Adjustable pressure**

Visual gauges and powerful regulators provide variable pressure across a 0–200 bar range.

05 **Gun-trigger control**

Gun handle control, start-by-trigger operation and delay shutdown after the gun is turned off.

06 **Overload protection**

Overload protection function for safer operation.

07 **Heavy-duty frame**

Integrated steel frame structure with heavy-duty solid wheels for durability and easy movement.

TECHNICAL DATA

Model	**H20**
Working Pressure	**200 bar / 20 MPa**
Flow Rate	**15 L/min**
Power	**5.5 kW**
Motor Speed	**1450 rpm**
Weight incl. packaging	**110 kg**

STANDARD ACCESSORIES

01 **High-pressure hose**
15 m / pc

02 **High-pressure gun**
1 set

03 **Angle nozzles**
3 sets

BUILT FOR TOUGH, STUBBORN DIRT

Powerful rotary nozzles help remove stubborn oil and tree root bark from surfaces.
