Nilvac Enterprises · Valemaster · Karachi, since 1982

INDUSTRIAL CLEANING SOLUTIONS SINCE 1982.

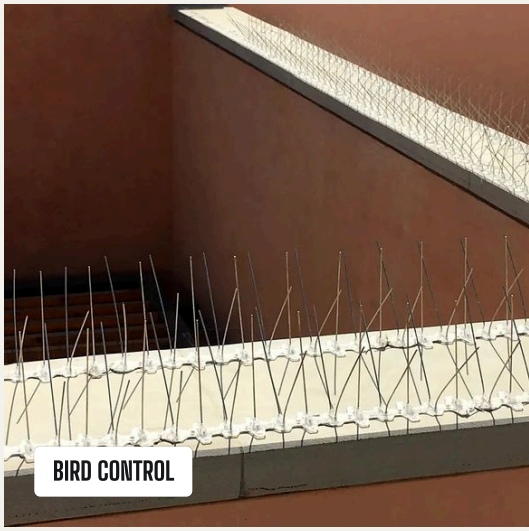

Valemaster industrial vacuum cleaners and central vacuum systems, cleaning equipment, protective coatings and diesel generators, supplied across Pakistan with spare parts and after-sales service for everything we sell.

INDUSTRIAL VACUUM CLEANERS

FLOOR CARE MACHINES

BIRD CONTROL

ENDUROSHIELD COATING

GARBAGE AND LAUNDRY CHUTES

DIESEL GENERATORS

SERVING PAKISTAN'S INDUSTRIES, BUILDINGS AND HOMES FOR MORE THAN FORTY YEARS.

Our association with industrial cleaning equipment began with our first imports in 1956. Nilvac Enterprises was founded in Karachi in 1982.

The Valemaster range includes industrial vacuum cleaners, motorised hose reels, central vacuum systems and bird spikes. We also supply diesel generating sets and professional cleaning, maintenance and power equipment from established international brands, so clients can source it from one company, with installation and after-sales service by our own team.

1956

FIRST IMPORTS

The late Shujauddin Sajjani begins importing industrial cleaning equipment into Pakistan.

1982

NILVAC ENTERPRISES FOUNDED

The company is established in Karachi with its own factory, and the Valemaster brand is launched: industrial vacuum cleaners, floor polishers and mopping trolleys.

Today

SUPPLY, INSTALLATION AND SERVICE

We supply, install and service equipment for clients across Pakistan, with spare parts held in stock.

Karachi
Home of Nilvac Enterprises since 1982

Valemaster

INDUSTRIAL VACUUM CLEANERS.

Six models, from 1.5 kW single phase to 7.5 kW three phase. They are used across Pakistan in textile, cement, tobacco, pharmaceutical, food, steel, printing and automotive plants, in hospitals, hotels and mosques, and in many other industries.

	Model	Supply	Motor	Max vacuum · airflow	Container
	S-11	220 V, single phase	1.5 kW	240 mbar · 210 m³/h	35 L
	S-21	220 V, single phase	1.5 or 3 kW	240 mbar · 210 / 420 m³/h	95 L stainless
	S-53	220 V, single phase	2 × 1.5 kW	240 mbar · 420 m³/h	80 L
	S-72	380 V, three phase	2.2 kW	210 mbar · 318 m³/h	50 L
	S-80	380 V, three phase	4 kW	290 mbar · 318 m³/h	80 L
	S-121	380 V, three phase	5.5 or 7.5 kW	300 / 320 mbar · 530 m³/h	160 L

Vacuum and airflow are the motor ratings at 50 Hz; where two figures are given, they are for the lower and the higher motor rating. Full specifications are in our industrial vacuum cleaners brochure.

CONFIGURED FOR YOUR APPLICATION

Every model is matched to the material, the duty cycle and the site

Container capacity
A larger container for bulky material or long shifts.

Motor rating
Higher power for long hose runs and dense dust.

Filtration
Finer filters for flour, cement and pharmaceutical powders.

Hoses and tools
Longer hoses, wide floor tools and crevice tools for machinery.

Wet and dry pickup
Collects dust, lint, flour and metal chips, as well as spilled water.

Spare parts
Filters, hoses, motors and other spare parts for every model.

HOSE REELS AND CUSTOM SYSTEMS.

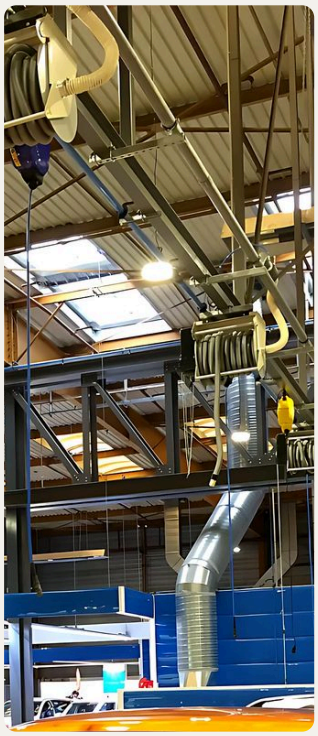

MOTORISED HOSE REELS

Each reel is mounted above a machine or workstation and connected to the vacuum cleaner. A pendant switch lowers the hose and rewinds it after cleaning, so it never lies on the floor.

Mounting	Ceiling or wall, above each machine
Compatible with	S-53, S-72, S-80 and S-121
Applications	Production lines, machine shops and workshops

Motorised hose reel
With its wall bracket

Vehicle workshop
A reel above each bay

CUSTOM-BUILT SYSTEMS

When a standard model is not enough, we design and build equipment around the client's process, such as this cyclone separator made for one of our clients.

Tool sets

Motor heads and spares

Valemaster central vacuum systems

CENTRAL VACUUM SYSTEMS.

A built-in vacuum system for homes, offices, mosques and commercial buildings. The power unit is installed in a utility area and connected through concealed pipework to wall sockets in each room, so cleaning is quieter and dust is carried out of the living space. We design each layout and install the complete system.

Wall socket and hose
The lightweight hose plugs into a wall socket and the system starts. The power unit is installed out of sight.

Wall sockets, hose and tools

A wall socket in each area. Floor, upholstery and crevice tools fit the same wand, and one socket can serve several rooms.

Concealed pipework

50 mm pipework runs inside the walls and floors from every socket to the power unit, best installed before plastering.

Power unit

Installed in a basement, garage, store room or on the roof, with the motor and dust container away from the living area.

WHY CHOOSE A CENTRAL SYSTEM

Quiet operation

Only the airflow at the hose is heard in the room. The motor is in a utility area.

Dust removed

Exhaust air is released away from the living area instead of being returned to the room.

Easy to use

No machine to carry between floors or around furniture, only a lightweight hose and tools.

Minimal storage

Only the hose and tools need storing. The power unit is installed out of sight.

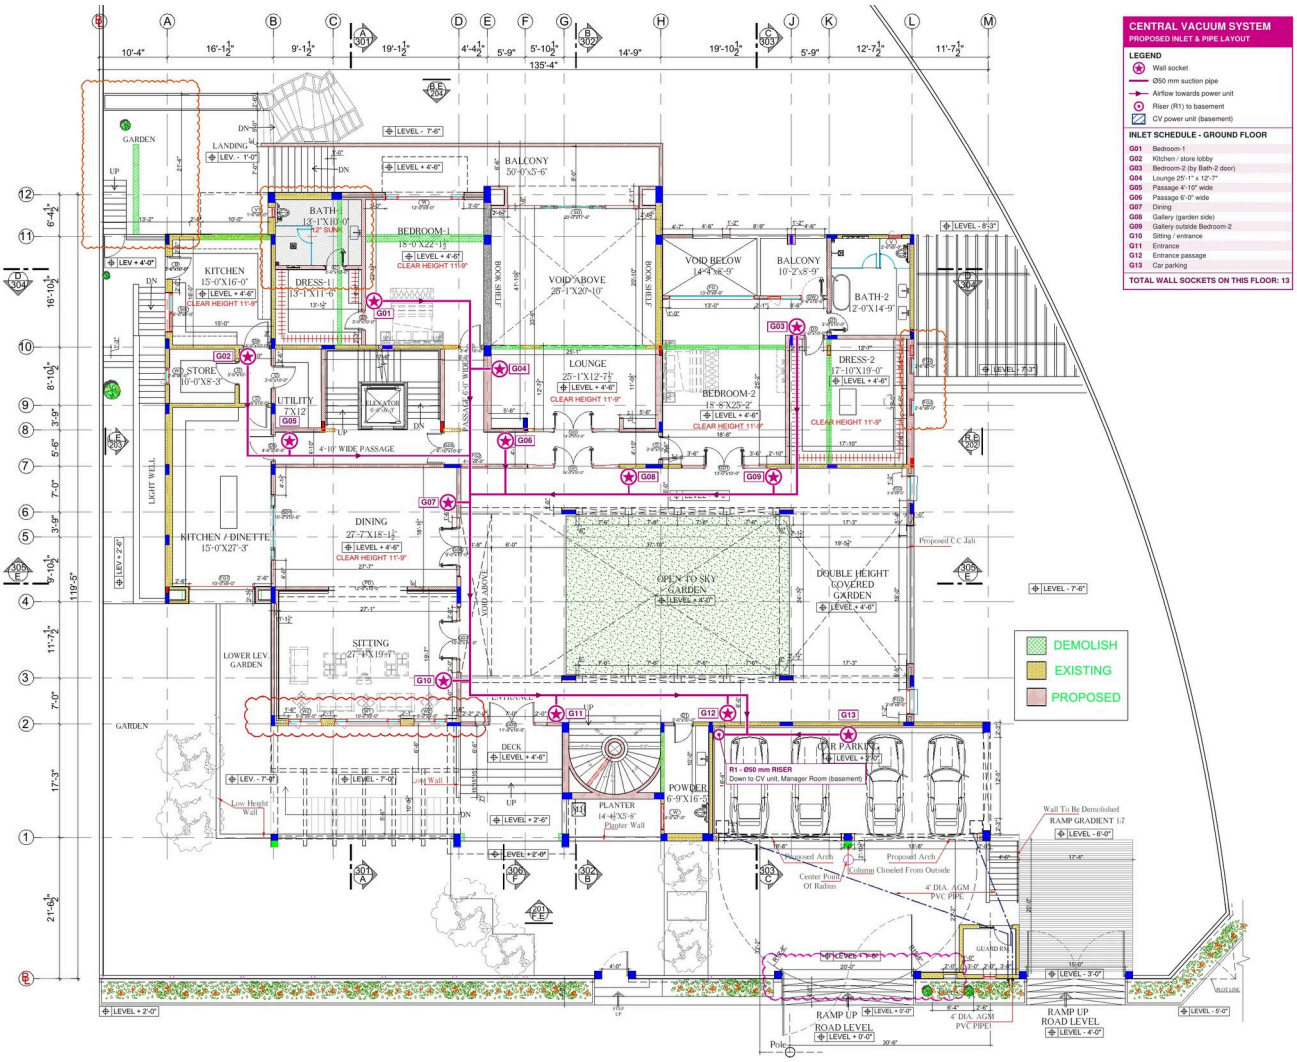

100+

Homes fitted with Valemaster central vacuum systems, designed with the architect, installed by our own team and serviced after handover. We also fit systems in offices, residential buildings and mosques.

System design

DESIGNED ON THE BUILDING PLANS.

Our layout for a three-storey home in Karachi: 32 wall sockets positioned beside electrical points, 50 mm pipework on the shortest practical routes, and the power unit in a basement room. Client name and address removed.

SELECTED INSTALLATIONS

Homes, offices, residential towers and places of worship

Corporate · Karachi

EFU LIFE HOUSE

Covers the office floors and the parking, with the power unit outside the working areas.

Corporate · Islamabad

ABS nozzles for fixed wash lines along a row of panels.

ABS · Black

Made in Pakistan

Drain clip

Clips onto the panel frame so water and dust run off the bottom edge instead of drying on the glass.

30 & 35 mm frames · ABS

Bird Spike · Bird-X

BIRD CONTROL.

Stainless steel and plastic bird spikes, and Bird-X electronic repellers for open areas. We supply the spikes on their own, or install them for you. Spikes stop birds from landing without harming them.

BIRD SPIKES

The strips join end to end and are fixed with adhesive or screws.

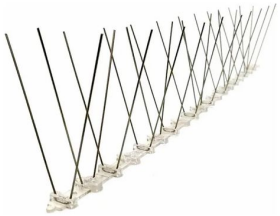

Stainless steel

BS-12

For narrow ledges, signs, sills and ducting.

12 cm spikes · 30 cm strip · 18 points · SS 304, 1.42 mm

Stainless steel

BS-20

Longer spikes for wider ledges, parapets and beams.

20 cm spikes · 50 cm strip · 18 points · SS 304, 1.42 mm

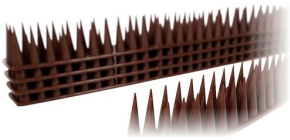

Plastic

Plastic bird spikes

Rigid plastic strips for ledges, parapets, walls and signs, with fixing holes in the base. Light, rust-free and quick to install.

44 cm strips · Pack of 10 · 4.4 m

Plastic

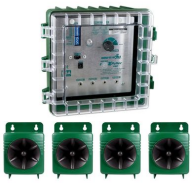

Bird and cat spikes

Taller plastic spikes that keep cats as well as birds off walls, fences and gates. Each strip snaps into three segments to fit around corners.

12 strips per pack · Screw holes · Snap segments

BIRD-X REPELLERS

For warehouses, loading docks, rooftops and open yards, where spikes cannot be fitted. The repellers play the distress and predator calls of common pest birds.

Bird-X · sonic

Super BirdXPeller PRO

A control box with speakers that plays programmable distress and predator calls, for large open areas.

Up to 6 acres · 8 bird sounds

Bird-X · sonic and ultrasonic

BroadBand PRO

Combines audible distress and predator calls with ultrasonic sound, for persistent bird problems.

Sonic · Ultrasonic

ENDUROSHIELD COATING.

A clear, water-repellent coating for glass, solar panels, tiles and stainless steel. Treated surfaces stay clean for longer and are quicker to clean. We supply EnduroShield, and our trained team applies it on site.

Up to 90%

Less cleaning time, according to EnduroShield

Clear

No change to the appearance of the glass

On site

Applied by our team, or supply only

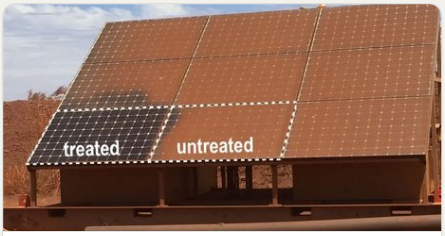

Glass

Shower screens, windows and façades

Water beads and runs off, reducing limescale and dirt build-up on the glass.

Showers · Windows · Façades

Solar panels

Solar panels

Dust and bird droppings wash off more easily, helping panels stay cleaner between cleans.

Rooftops · Solar farms

Tiles and grout

Tiles, grout and porcelain

Protects against stains and soap scum in washrooms and kitchens.

Tiles · Grout · Porcelain

Stainless steel

Stainless steel

An easy-clean layer for splashbacks, lift doors and fittings.

Lifts · Kitchens

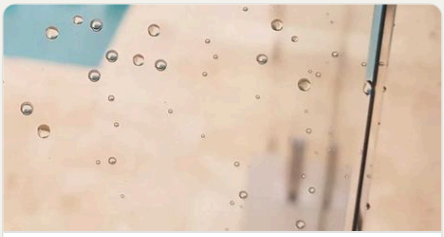

Preparation

EnduroClean pre-cleaner

Cleans and prepares the surface before EnduroShield is applied.

500 ml

Pool fences

Pool fences and balustrades

Pool water, chlorine and rain run off the glass instead of drying into spots.

Pool fences · Balustrades

Nano Shield by Thrakon · Greece

NANO SHIELD.

Transparent protection for marble, granite, natural stone, brick, concrete, plaster and tile grout, indoors and outdoors. Nano Shield products penetrate porous surfaces and protect them against water, oil, salts and mould without changing their appearance. We supply them, and our trained team applies them on site.

Breathable

Protects from within the pores, with no surface film

Indoor & outdoor

Floors, walls, planters and paving

Clear

Retains the natural appearance of the stone

Thrakon · Greece

Nano Shield O

A nano-molecular protector for absorbent surfaces. It stops oil stains, moisture, salts and mould from getting into marble, granite, brick, concrete, plaster and grout.

Oil & stains | Moisture | Mould

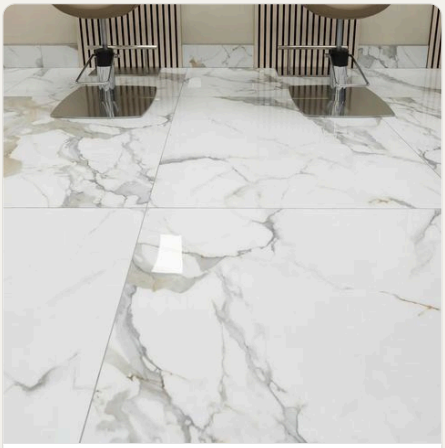

Thrakon · Greece · 5 L

Nano O Shield 53

A transparent water and oil repellent that waterproofs absorbent and non-absorbent surfaces, indoors and outdoors.

Water repellent | Indoor & outdoor

Marble · limestone · travertine

Stain protector for natural stone

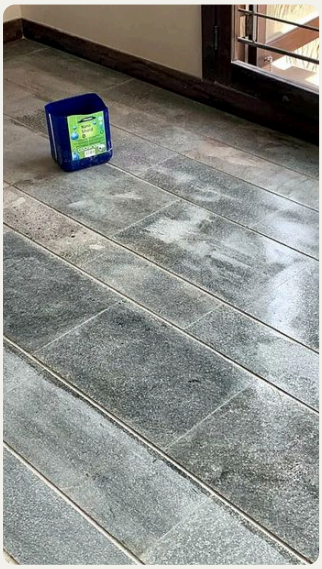

A solvent-based protector that soaks into marble, limestone and travertine, so spills can be wiped up before they mark.

Solvent-based | Natural stone

We also supply the Maxiseal VH72 sealer.

ON-SITE APPLICATION

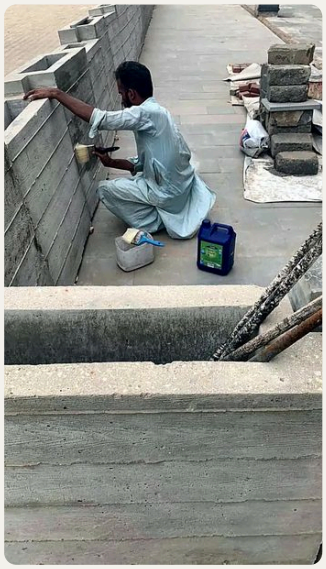

Stone floors, façades, pool decks, terraces, concrete planters, shops and homes

Paving sealed against water and stains

DownWaste · Turkey

GARBAGE AND LAUNDRY CHUTES.

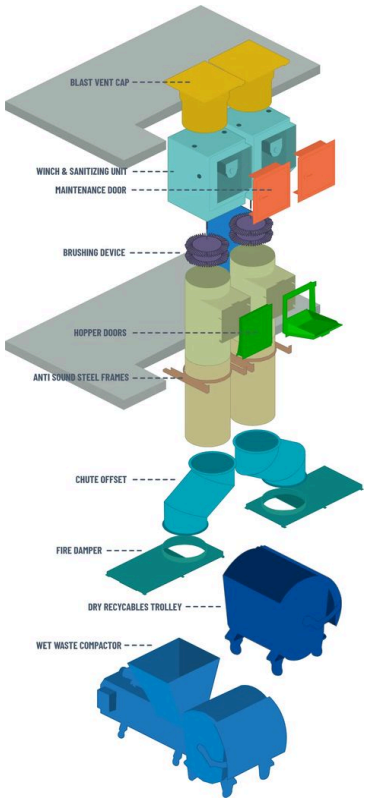

Garbage, laundry and recycling chute systems for hospitals, hotels and residential buildings. Waste and soiled linen are discharged through a sealed stainless steel chute to a single collection room, keeping them out of corridors, lifts and public areas. We install DownWaste chute systems in Pakistan.

Ø 300–800 mm
Chute diameters, 600 mm recommended

1.5 mm SS304
Stainless steel, 304 or 316, seamlessly welded

90 min
Fire-rated intake doors to UL 10B

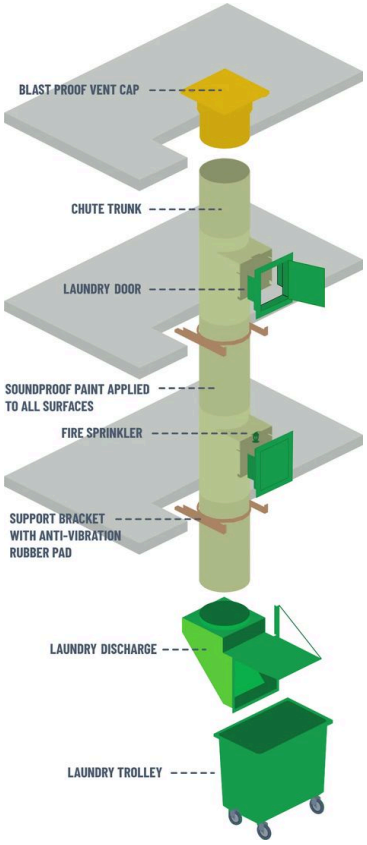

72 °C
Fusible link closes the discharge damper in a fire

DownWaste

Garbage chute

Bagged waste from each floor to bins or a compactor, with a recycling selector as an option.

DownWaste

Laundry chute

Soiled linen from each floor directly to a trolley in the laundry.

Automatic door

Opens electrically, with status lights.

Mechanical door

A robust hopper for service areas.

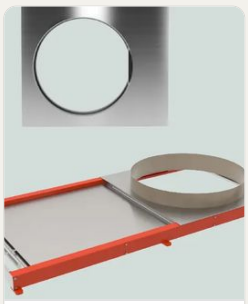

Laundry door

Side-hinged, with interlock lights.

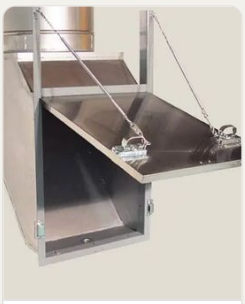

Vent cap

Vents the shaft above the roof.

Fire damper

Seals the shaft at 72 °C.

Laundry discharge

Delivers linen into the trolley.

Project · Karachi

SAIFEE HOSPITAL, CARDIAC WING

Garbage and laundry chutes installed by our team in the eleven-storey wing, with a separator at the base for recyclables. DownWaste systems are also installed in Kuwait, Bahrain, the UAE, Qatar and Greece.

Diesel generating sets · 1 to 500 kVA

GENERATORS AND UPS SYSTEMS.

We supply diesel generating sets for prime and standby power, with installation and maintenance by our own team. As a Honda dealer, we also supply Honda generators and water pumps, and we size, install and support UPS systems from leading manufacturers.

Diesel generating sets

OPEN, CANOPIED OR CONTAINERISED

Engines from Cummins, Perkins, Daewoo and other makes, with a brushless alternator, a digital controller, and AMF or ATS panels for automatic changeover.

We install the fuel, exhaust, cabling and earthing, commission the set and maintain it after handover.

Frama revenue machines

FRAMA TAX METER.

A desktop revenue machine that prints stamp duty directly onto documents and records every impression. We supply the Tax Meter to banks, government departments and offices across Pakistan, with installation, training and service from Karachi.

3,000
Impressions an hour, at full speed

6 mm
Maximum document thickness

A4
Feed table for full-size documents

50
Password-protected accounts with the largest upgrade

HOW IT WORKS

01

Select the value

Key in the amount, or press a one-touch key set to a value you use often. The touchscreen shows the value, date and account before printing.

02

Feed the document

Documents up to A4 and 6 mm thick. The machine prints the impression with a thermal-transfer ribbon and ejects the sheet.

03

Every impression recorded

Each account has resettable and non-resettable registers. Users are password-protected and the housing is lead-sealed.

CREDIT CONTROL AND ACCOUNTING

Credit loading

Offline with a credit loading box, or online over the network with FramaOnline2.

Accounts

10 password-protected accounts as standard, upgradable to 20 or 50.

Security

Lead-sealed housing, automatic date change and a warning before a high value is printed.

In use at banks across Pakistan (Soneri Bank, Meezan Bank, HBL, etc.) and in the shipping industry. Frama franking machines for mail rooms are also available. Figures from Frama's Tax Meter data sheet.
